TECHNICAL DATASHEET

Omnitub Seated Tub

1495 x 800 x 1000

External Length	1495mm / 149.5cm / 58.86in
External Width	800mm / 80cm / 31.50in
External Height	1000mm / 100cm / 39.37in
Internal Seat Length	400mm / 40cm / 15.75in
Internal Seat Height	400mm / 40cm / 15.75in
Soaking Depth	With No Overflow 975mm
Soaking Depth	With Overflow 925mm
Dry Weight	45KG
Water Capacity (Up To 785 mm Water)	642 Liters
Cold Water Required (10 Degree Assumption)	258 Litres
Hot Water Required (60 Degree Assumption)	384 Litres
Soaking Temperature Example	40 °C / 104 °F

Dimensions are shown in millimetres.

Notes

Our guarantee is subject to the product having been installed, used and maintained in accordance with our instructions. The guarantee applies to the original purchaser and is nontransferable. We recommend that this product is installed by a professional bathroom installer or fitter.

DESIGN CONSIDERATIONS

Drilling overflows

How to cut overflow holes into an Omnitub

Fibreglass is an easy material to drill through, therefore drilling an overflow hole into your Omnitub is straightforward for both professional installers/bathroom fitters and the individual home owner. It is important that the person who is drilling the hole into the Omnitub is wearing the correct safety equipment (such as protective goggles) because fibreglass is a bit more sensitive than other materials.

INSTRUCTIONS ON HOW TO DRILL AN OVERFLOW HOLE

1. Make sure to pin point and measure exactly where you want to drill your overflow
2. Look at your chosen overflow mechanisms technical datasheet to understand what size hole needs to be drilled
3. Mark the location of the drill point using a marker pen
4. Once you are confident of the overflows proposed location, set your diamond-cut hole saw to the correct measurement (the standard size overflow hole is 52 mm in diameter, however you must ensure that your hole size will match exactly to your chosen overflow mechanisms technical datasheet)
5. Place the diamond-cut hole saw onto the proposed location and start drilling then pushing gently into the fibreglass material until you have drilled through completely

Drilling holes into our fibreglass bath tubs should be carried out by a professional installer/bathroom fitter. If you do not have much DIY experience, then we would recommend that you contact a qualified plumber, professional bathroom installer/fitter to carry out the work. This will also ensure that the job has been carried out correctly because they will have all of the tools necessary to complete the job.

This principal follows suit across all of our fibreglass bath tubs and can be carried out by any professional bathroom installer/fitter. IMPORTANT NOTICE*

Ensure that you have carefully thought where the hole(s) will be drilled because any Omnitub which has been drilled will be non-returnable and non-refundable. Omnitub carry out a chargeable cut and trim service which when any hole(s) have been drilled, this classes the your Omnitub as a bespoke product which is non-returnable and non-refundable.

MAINTENANCE

Cleaning guide

Instructions on how to clean your Omnitub

HOW OFTEN SHOULD YOU CLEAN YOUR OMNITUB?

It is recommended that you clean your Omnitub regularly to eliminate the chance of mold build-up and will keep your bathroom smelling fresh. If you use your Omnitub regularly, we recommend that you give it a routine clean every week and a deep clean once a month.

REQUIRED PRODUCTS

- Latex gloves
- Squeegee
- Non-abrasive bath cleaner
- Soft sponge
- Dry soft towel

TOP TIPS TO KEEP YOUR TUB CLEAN FOR LONGER

- Remove any excess water from the tapered walls of the tub by using a squeegee to sweep it down the waste hole
- Using a non-abrasive bath cleaner, clean the tile grout to eliminate the chance of mould build-up
- Remove the limescale which can build-up on the end of the taps by using a non-abrasive bath cleaner with sponge/microfibre cloth

INSTRUCTIONS ON HOW TO CLEAN YOUR OMNITUB

- Before getting started, clear all toiletries from the area and slip on latex gloves to protect your skin
- Using a non-abrasive bath cleaner, spray the flanges of the Omnitub and inside of the bath tub
- Using a soft sponge, scrub the tub working from the top down so that the debris falls into the tub as you clean
- Wipe away dirt and spills with a microfibre cloth
- To remove stubborn stains like soap rings, use lemon juice and a mild cream cleanser and apply the mixture onto a soft sponge

Once you have thoroughly cleaned the Omnitub, it is important that you rinse the area with water really well, then wipe completely dry using a dry soft towel to avoid streaks.

To help keep your bath fresh in-between deep cleans, rinse well, wipe away excess moisture and let the area thoroughly dry between each use.

By keeping your bath clean and sanitized will not only leave it sparkling, but it will also keep everyone using the bath tub happy and healthy.

IMPORTANT KEY NOTES

- To remove tough grout stains, scrub a mixture of baking soda and vinegar and use a small narrow soft brush to eliminate the debris from the Omnitub. However, please note that if you decide to carry out this method, your bath tub will lose its polished finish and become a matt finish. To fix this, you will need to speak to someone who can hand-hold polish your Omnitub.
- You must not use abrasive cleaning materials such as bleach to clean your Omnitub. We will not cover any bath tub where it has had an abrasive material used to carry out any form of cleaning or maintenance.

MANUFACTURERS GUARANTEE 30 YEARS

As a reputable manufacturer, we are personally prepared to support our customers with a **meaningful guarantee lasting up to 30 years.**

For a full explanation of our manufacturers guarantee, please visit www.omnitub.co.uk/manufacturers-guarantee

It is important to note that our 30 year manufacturer guarantee covers manufacturing faults and defects only. It does not cover and will not accept claims for accidental damage or fair wear & tear.

WARRANTY

Omnitub Ltd guarantees that all of our Omnitub® bath tubs are fit for purpose and that its design and manufacturing process conforms to all relevant legislation ensuring that the products sent to the recipient is free of any defects in relation to both materials and workmanship.

Whilst all of our Omnitub® bath tubs are manufactured from reinforced fibreglass, all manufactured products carry a 30-year manufacturers guarantee against structural failure, loss of rigidity, leakage, and surface breakdown.

It is important to note that prior to any product being dispatched from any affiliated address in relation to Omnitub Ltd, all products undergo our companies standard Quality Assurance procedure to ensure that the item(s) are fit for purpose and free of any defects.

In the unlikely event of any faults occurring on your Omnitub® bath tub or other manufactured product sold by Omnitub Ltd, our organisation will carry out the following process:

- Obtain and compile all digital imagery in relation to the order in question
- Analyse all digital imagery in-house by our Quality Assurance team

If the Omnitub® manufactured products are found to have been damaged prior to the order being dispatched, then our organisation will carry out the following:

- Exchange the faulty product for a new product of the same specification
- Repair and refurbish faults which are deemed as minor at Omnitub Ltd's own expense

Omnitub Ltd will not accept any liability for any consequential loss caused by the inconvenience.

OUR WARRANTY DOES NOT COVER THE FOLLOWING

- Omnitub Ltd will not cover any damage caused by misuse, poor maintenance or lack of care.
- Omnitub Ltd will not cover any damage caused by exposure to abrasive materials and equipment, harmful cleaning materials and chemicals, and exposure to naked flames.
- Omnitub Ltd will not cover any form of normal wear and tear.
- Omnitub Ltd will not cover damage caused by improper installation.
- Omnitub Ltd will not cover any damage caused by failure of waterproof sealing any hole drilled into the Omnitub® bath tub where the drilling has occurred at any of our affiliated locations.
- Omnitub Ltd will not cover any alterations to any Omnitub® bath tub or manufactured product.

PLEASE NOTE* All judgements by an authorised body of Omnitub Ltd are final.
